FERALEX company was created in 1985, it is specialized in the manufacturing of leather gloves.

FERALEX is well established in the market of gloves in Portuguese reversed lambskin, curly (of New Zealand) and also peccary (South America).

Year after year, Feralex creates a new collection, following the fashion trends and the market.

Our mission is the development of collections for prestigious brands of haute couture well established in the fashion world, for which we work for custom.

Cr  e en 1985, la maison Feralex est une fabrique tr  s sp  cialis  e dans la production de gants en mouton portugais, curly ,agneau, cerf et p  cari.

Chaque ann  e Feralex cr  e nouveaux mod  les toujours en parfait accord avec les tendances de la mode et du march  e.

Notre mission constant est le d  veloppement de collections de prestige pour les maisons de haute couture bien connues et pour lesquelles nous travaillons sur commande.

Fundada em 1985, a FERALEX    especializada no fabrico de luvas em pele.

A FERALEX est   muito bem implantada no mercado, sobretudo no que se refere a luvas em pele de borrego nacional, borrego encaracolado proveniente da Nova Zel  ndia (curly) e tamb  m pele de porco selvagem (peccary da Am  rica do Sul)

Ano ap  s ano, a Feralex cria uma nova cole  o, acompanhando as tend  ncias da moda e do mercado.

Temos por miss  o o desenvolvimento de cole  o  es para prestigiadas marcas de alta-cos-tura bem implantadas no mundo da moda, para as quais trabalhamos sob encomenda.

Portuguese Lamb

Iberian sheepskin, usually from adult animals. It is thicker this way, which gives the glove a more bulky appearance and provides a pleasant feeling of warmth. The fur can be curly appearance or ironed.

Agneau Portugais

Peau originaire de la péninsule ibérique, à des animaux adultes. Il est plus épais de cette manière, ce qui donne le gant un aspect plus volumineux et assure une agréable sensation de chaleur. La peau peut être bouclé ou lustré.

Borrego Nacional

Pele oriunda da Península Ibérica, normalmente proveniente de animais adultos. É deste modo mais espessa, o que dá à luva uma aparência mais volumosa e proporciona uma agradável sensação de calor. A lã pode ser encaracolada ou lisa.

Curly (New Zealand)

The New-Zealand lamb gives the fine suede skin with curly and warm wool inside with which are produced our finest gloves of Reversed Lambskin. The skin is turned over and it is specially treated to achieve a chamois-like and beautiful surface.

Curly (Nouvelle-Zélande)

Le mouton de Nouvelle-Zélande nous donne un belle peu chamoisée avec laine chaude et bouclée au-dedans avec laquelle sont faits nos plus fins gants de mouton retourné. Le peau est tournée et traitée de manière à obtenir une apparence de chamois en même temps qu'une belle surface.

Curly (Nova Zelândia)

A pele de borrego da Nova Zelândia é muito suave e tem pequenos caracóis de lã quente. É com esta pele que são produzidas as nossas melhores luvas de borrego. A pele é especialmente tratada para conseguir uma superfície camurçada com um fino toque e uma bonita aparência.

Peccary

The main characteristics of this grainy leather are the three pores grouped in a triangular shape throughout the hide. These gloves are manufactured from the skin of a wild animal. These skins are frequently scarred, and although the scars cannot be removed by the tannery in dressing, they do not in any way affect the wearing quality of the gloves. They are in fact proof of the genuineness of the article. The peccary skins are the finest for glove manufacturing. The gloves are highly durable, light and most elegant.

Pécari

Les principales caractéristiques de ce cuir granuleux sont les trois pores groupés dans une forme triangulaire à travers la peau. Ces gants sont manufactures avec la peau d'un animal sauvage. Ces peaux ont parfois des cicatrices, et malgré le fait qu'elles ne peuvent pas être ôtées, les cicatrices n'affectent pas la qualité des gans. Les cicatrices sont, en fait la preuve que l'article est véritable. Les peaux de peccary sont les meilleurs pour la manufacture des gants. Les gants sont très durables, légers et très élégants.

Pecari

A principal caraterística desta pele é ter três poros agrupados em uma forma triangular. Estas luvas são fabricadas a partir de peles de animais selvagens. As cicatrizes são frequentes nas peles de peccary e não podem ser removidas pelo curtume, são uma prova da autenticidade do artigo e não afetam de forma alguma a qualidade das luvas. As peles de peccary são as melhores para o fabrico de luvas. As luvas são de longa durabilidade, leves e muito elegantes.

Deer Skin (North America)

The North America Deer used to be one of the few wild animal with which skin gloves were produced. Nowadays, the skins come from deer which are farmed specifically for human consumption. Its skin is strong and gives a wonderful feeling of warmth, strength and smoothness.

Cerf Veritable (Amérique du Nord)

Le cerf de l'Amérique du Nord était un des rares animaux sauvages dont la peau sert à faire des gants. Aujourd'hui les peaux sont proviennent d'animaux d'élevage utilisez aussi pour la consommation humaine. Sa peaux est résistant et donne une merveilleuse sensation de chaleur, force et souplesse au même temps.

Veado (América do Norte)

O veado da América do Norte era um dos poucos animais selvagens a partir do qual era produzida pele para luvas. Hoje em dia as peles são provenientes de veados domesticados especificamente para consumo humano. Estas peles são fortes e dão uma agradável sensação de calor, força e suavidade.
